Education

Punjab Tianjin University of Technology   **Lahore, Pakistan**
Bachelor of Science in Software Engineering Technology (BSCSET)   *Expected 2026*
- Relevant Coursework: Data Structures, Algorithms, Database Systems, Web Development, Software Engineering
- Activities: Active participation in coding competitions and tech workshops

Technical Skills

Programming Languages: PHP, JavaScript, HTML, CSS, SQL
Frameworks & Libraries: Laravel, React.js, Bootstrap, REST APIs
Databases: MySQL, Database Design, ERD Modeling
Developer Tools: Git, GitHub, VS Code, Composer, npm
Creative Tools: Adobe Premiere Pro, Adobe After Effects, Video Editing, Motion Graphics
Core Competencies: Full-Stack Web Development, API Design, Authentication & Authorization, CRUD Operations, Agile Methodologies, Problem Solving

Professional Experience

Full-Stack Web Developer   **September 2025 – Present**
Freelance / Contract Work   *Lahore, Pakistan*
- Architected and deployed scalable web applications using Laravel framework, serving 1000+ users with 99.9% uptime
- Designed and implemented RESTful APIs enabling seamless frontend-backend communication, reducing data transfer time by 40%
- Developed role-based authentication and authorization systems with secure JWT token implementation
- Optimized database queries and implemented indexing strategies, improving application response time by 35%
- Collaborated with cross-functional teams using Git for version control and Agile methodologies for project management
- Conducted code reviews and mentored junior developers on best practices and design patterns

Video Production Specialist   **January 2024 – Present**
Freelance Creative Services   *Lahore, Pakistan*
- Produced 50+ high-quality promotional videos and motion graphics for clients using Adobe After Effects and Premiere Pro
- Executed advanced animation, keyframing, and compositing techniques to create engaging visual content
- Managed end-to-end video production including 4K editing, color grading, and rendering optimization
- Delivered projects 20% ahead of schedule through efficient workflow automation and asset management
- Maintained client satisfaction rate of 95% through effective communication and iterative feedback incorporation

Projects

Factory Management System | *Laravel, MySQL, REST API, Bootstrap*   **September 2025 – December 2025**
- Engineered a comprehensive ERP system managing articles, fabrics, inventory, invoices, and customer data for manufacturing operations
- Implemented full CRUD functionality with advanced search, filtering, and pagination features for efficient data management
- Designed normalized MySQL database schema with ERD modeling, establishing proper relationships and foreign key constraints
- Built RESTful API endpoints with JSON responses, enabling potential integration with mobile and third-party applications
- Integrated role-based access control (RBAC) ensuring secure data access across different user hierarchies
- Developed automated invoice generation system reducing manual processing time by 60%

Achievements & Certifications

Academic Excellence: Consistent Dean's List student with 2.7+ GPA
Online Learning: Completed advanced Laravel development courses on Udemy and Laracasts
Languages: Fluent in English, Urdu, and Korean (conversational)
