husnainweb.online

Software engineer delivering client websites, REST APIs and business applications. Experienced in Laravel, WordPress/WooCommerce, ERP quality assurance and Clover + Smart Online Order integration, with strong communication skills and a focus on client satisfaction.

01 Professional experience

Laravel Developer

NetRoots Technologies (NRT) | Lahore

DEC 2025 - PRESENT

- Develop Laravel/PHP pages and dynamic blog features for university clients including UCL and BHS.
- Build admin CRUD panels for database-backed content, supporting record creation, viewing, updates and deletion.
- Maintain WordPress/WooCommerce websites; resolve plugin conflicts, SMTP delivery failures and SEO/sitemap issues.
- Test Cornerstone, MCJ and OPF Laravel ERPs: Purchase Requisition, GRN, Inventory, Fee Management and HR.
- Verify forms, permissions, reports and data flow; document reproduction steps and expected/actual results, and coordinate fixes with developers.

Full-Stack Web Developer

Freelance / Contract | Remote

SEP 2025 - PRESENT

- Build and deploy Laravel applications supporting 1,000+ users in production; develop RESTful APIs with JWT authentication and role-based access control.
- Optimize MySQL queries and indexing; translate client requirements into working website and application features.
- Prioritize client satisfaction through clear communication, progress updates and responsive, feedback-led revisions.

02 Selected projects

America's Greatest Wings | Clover POS + Smart Online Order

Implemented Clover POS + Smart Online Order on the WordPress website, including custom location-popup and branch-routing code. Completed first-branch menu and DoorDash Drive setup; tested customer delivery-fee updates.

HUJ Consulting | Website development

Worked on hujconsulting.com, refining navigation, hero presentation and section spacing to improve layout consistency and readability.

Learning Management System | Laravel / MySQL / React

Built course, lesson and enrollment management, Admin/Instructor/Student dashboards, JWT authentication and Chart.js analytics on a Laravel REST API, with persistent dark/light UI preferences.

Factory Management System | Laravel / MySQL / Bootstrap

Built modules for articles, fabrics, inventory, invoices and customers; implemented automated invoicing, normalized data models, REST APIs and role-based access.

TECHNICAL SKILLS

LANGUAGES
